Logged entry:
A light fixture with a light bulb dimming on and off every 90 minutes (45 minutes ON, 45 minutes OFF) 15 times a day, corresponding to the 15 sunrises and 15 sunsets that the astronauts experience on the International Space Station (ISS) orbiting around the earth in a 24-hour period.

Event:
Sina from Cabinet Magazine sends me instructions for the 24-hour project with topic on the temporal structure of day/night.
